RECIPROCITY.

[To the Editor of the Interior Journal.] In a former article we asserted that James G. Blaine was the boss trickster and political demagogue of the 19th century; passing events have served to strengthen the conviction. When Mr. Cleveland sent his great tariff message to Congress, Mr. Blaine with unseemly haste cabled from Paris his pronunciamento, taking the most direct and positive grounds against the message. This declaration of Mr. Blaine and his succeeding campaign speeches largely gave direction to republican sentiment on the tariff, were potent in Harrison's election and as a final sequence, the passage of the McKinley bill. In the light of his previous conduct, it is difficult to surmise Mr. Blaine's real motives in antagonizing the McKinley bill. Possibly it was jealousy of Reed and McKinley; or he may have foreseen the storm of indignation brewing over the advocates of protection and determined to cast an anchor windward. Whatever may have congratulates himself that he has made a most fortunate escape, and smiles complacently over Reed and McKinley political cyclone.

Mr. Blaine's reciprocity project is a very transparent device to distract the minds of the people from the turpitude of republican legislation and furnish himself a hobby upon which he hopes to ride into the White House. Why must reciprocity be limited to China, Japan and the American States South of us? The American States, it is true, are situated on the same continent, but the people are not kindred or similar to us in any respect. Neither are they the material from which civilization is formed. They are Spanish, mongrel, Negro and Indian; their religion is the lowest continent. They want fat, bound to tious and ignorant beyond our powers of their "blocks of five." J. S. REPPERT. conception and in the main idle and worthless. Spaniards are the ruling class; and Spain herself is the tail end of the Latin race. She has been in a State of decadence for more than three centuries and her colonies, wherever planted, have proved turbulent and thriftless.

Says Mr. Blaine, "The McKinley bill has not provided a market for a pound of bacon or bushel of wheat." But he I call common. None of these nations has at against our farm products. Our farmers are compelled to sell in the open market of the world and therefore have as much access to the markets of these nations, under present conditions as they are likely to secure under any reciprocal arrangement. Ah, but says Congress in its assembled wisdom, you must buy from us, if you do not, we shall place a heavy import duty on your tea, sugar and coffee. Yes, it proposes to extort million dollars annually. What for? THE COMMERCIAL HOTEL To punish the mongrels of South America and the heathens of China and Japan because they will not walk up and help pay the republican fiddler. It is highly improbable that the astute statesmen of the republican party have the least idea that their reciprocity project will result in any benefit to the farmer or masses, but they perseive that by their finely planned scheme, if all else fails, it will be a plausible excuse to reimpose tariff RILEY HOUSE, duties on these necessaries of life and supply large revenue to an exhausted treasury. The prevailing idea no doubt is that reciprocity can be so managed as to greatly inure to the benefit of the manufacturing interest, at all times and places the especial pet of the republican

> Under a natural condition of trade the United States would export many manufactured articles to countries named. But our high-pressure tariff has destroyed our shipping and so enhanced the value of everything we produce that we are unable to compete with other nations in manufactured goods. The very fact that high tariff is necessary to keep foreign goods from our own market is an open admission that we do not expect to export any protected article for sale in the open market of the world.

But there is sought to be conveyed with this term, reciprocity, a vague and mysterious notion that the present government possesses the power to make some special arrangement with these fills the soul with joy, but the blessings countries whereby we shall monopolize their trade. No such power exists, nor can exist in this age. Reciprocity means mutual conditions, resulting to the iujury of neither party. Nations in this day are guided strictly by economic principles in their commercial relations. They sell where they can sell for most and buy where they can buy for least. South America, China, Japan, &c., will never bay from us as long as they can secure the same products cheaper elsewhere. The utmost extent of our power is to allow these countries free trade with us. England long ago granted this to all nations, without asking or requiring any 307,141,340 were newspapers, free within

been much more liberal in trade than WOMEN WRITERS' GOWNS NEWCOMB HOTEL in asking a premium for our trade, when these countries have from others all the advantages we can bestow and to the full

extent of their wants. Mr. Blaine and his party refuse the possible and reach out after the impossible; ignore the worthy and seek the unworthy. They are deaf to the appeals of the impoverished and struggling masses of their own country and refuse comity to the English-speaking race; but under der the thinnest subterfuge would seek to add still more to the swollen coffers of the rich, and enter into the closest relations with the semi-civilized nations of China, Japan and South America. Mr. Blaire is greatly disturbed because for a few years we have admitted tea and coffee free of duty, and now proposes to retaliate unless certain things are done. For half a century England has received free of duty all our agricultural products. If we are so greatly disturbed over a little tea and coffee, how must she feel been his real motives no doubt he now under the free import of many times as much; and that too while we are constantly trying to impose prohibitive duties on all her products. Suppose Enghopelessly buried in the debris of the land, France and Germany retaliate on us, which is not by any means an im probable supposition, then will the last vestige of hope be taken from the farmer. But the reason is perfectly obvious why Mr. Blaine and his party will not reciprocate with Canada, England, France and Germany. It is not the farmer or the oppressed masses over whom they are agonizing, but the rich manufacturer and monopolist. The republican party know they are hopelessly in the minority if left to the unbiased vote of the people. They foresee that 1892 will usher in one of the most bitter political struggles ever witnessed on the type of Catholicism; they are supersti- have fat, and plenty of it, to lubricate

A sense of fear is a necessary element in the character of a dependent being. The man who never knows what fear is knows not what dependence is: and the man who knows not what dependence is has no appreciation of the right rela tions between himself and God. When in the middle of a summer night a child is suddenly awakened by a crash of thunder overhead, and clings with spasmodic grasp to its father, and hides its head close under his shoulfrom our own over-taxed masses, astariff der, the child shows its sense of on the necessaries of life, a hundred absolute dependence. It is really no more dependent upon its father then than at other times, so far as outward protection from danger is concerned. But its fear and terror have given it a new and quickened sense of its dependent relations to its father. And it is the expression of that dependence that comes with grateful sense to the father. even while he suffers in sympathy with the mental agony of his child. Is it not so in our relations to God? The "Fear not" and the "Be not afraid,"-are they not invitations to show our dependence upon God? It may be right to fear, in order that we may not do wrong in forgetting our dependent relations as earthly children of a Heavenly Father. -S. S. Times.

Olive Harper Tells How Some of Them Were Gowned at a Recent Reception Given the New York Woman's Press Club by Mrs. Bryan.

[Special Correspondence.]

NEW YORK, Dec. 11.—Those who imagine that literary ladies go in rag-tags, with unkempt hair, blue stockings and downtrodden slippers, ought to have been at a Press club reception that was given by Mrs. Mary E. Bryan, the editor and novelist, whom everybody loves.

Her hair was dressed in a low knot at the back, and in front in a forest of black curls from under which her eyes flashed darkly. The dress was certainly artistic and corsetless, but to my taste savored too much of a wrapper for evening. Still she ought to know. Mrs. Russell said poutingly to pretty little Mrs. Robert Burton, who, in dark blue velvet gown made plainly but very tastefully, sat quietly by: "Do you know I went to bed sick yesterday after reading one of the newspapers. They said 1 am not pretty. What would you have done in my place?"

"I should send the editor my photograph," was the witty reply.

THE MACE OF THE HOUSE more, is of as sterling worth as the first of its line.

IT IS NOT OFTEN USED, BUT IT IS A VERY POTENT AFFAIR.

The One Symbol of Absolute Power in the United States-Its History and Uses. Its Keeper, the Sergeant-at-Arms, and Some of his Duties.

[Special Correspondence.]

WASHINGTON, Dec 11. - Only once since this congress convened, more than a year ago, has the mace been called into use and that was when the member from New Jersey reached for the nose of the member from Washington with his energetic fist. To most visitors to the house of representatives the mace is a

mystery. They see, standing upon a round marble block, at the right of the speaker's chair a contrivance which looks like a bundle of sticks, surmounted by a ball and a bird. No one pays attention to this queer device. It is so seldom used and so often seen standing in its place that members and other habitues of the hall appear to be unmindful of its existence. The stranger, however, rarely fails to ask what it is. Lucky, indeed, is the visitor who sees the mace in action. The mace is mighty when stirred to movement.

It could not exert a more potent charm if it were a heathen idol and the occupants of the floor its devotees. When the mace is taken down from its pedestal and carried upon the floor the visitor may feel sure there is a crisis. There is extraordinary disorder, a fisticuff or a Dry Goods, Groceries, more often than once a year, but its every appearance creates a sensation. There was never yet a man so bold as to dispute right of way with the mace. All heads are bowed before it; all tongues As cheap as can be found. Come silent. And why not? It is the only royal insignia in this government. It is the most potential instrument of ceremony or ensign of authority on this continent. The mace represents the majesty of the American house of commons, and that means the people. The admiral of the navy may have his flag and the general of the army his star, but what are they if the body the mace rules does not support them?

All bonor, therefore, to the mace, and do not sneer at it because at first glance it appears a relic of ancient mummery, a meaningless, decorated stick. When the house next convened there was much consternation at the absence of the godhead of parliamentary authority. To meet the exigency a new god was quickly created, a false god compared to the thing of royal worth and beauty which had preceded it. The mace has its high priest in the person of the sergeant-at-arms. Every day at high noon, when the house meets, this official enters the hall, bearing the symbol in his hands, and places it upon its pedestal. When the house adjourns or takes a recess he carries it away to its cloister. Sometimes he takes it away when the house continues in session, or appears to do so, and this is something which the visitor cannot understand. The explanation is a simple one. Nearly every day the house resolves itself into committee of the whole house on the state of the Union. Usually on such occasions the speaker retires after calling a member to the chair, though he may preside if he wishes to do so. The committee of the whole is not the house of representatives, but what its name indicates, a simple committee of which every member of the house is a member, place as a silent guardian of its delib-

This high priest of the mace is also a sort of father confessor to the statesmen of the house. Ah, if his secrets were unveiled what sensations there would be in the land! The sergeant-at-arms has many delicate duties to perform besides that of polishing up the gold eagle. Once in a session or so it happens that a call of the roll failing to disclose the presence of a quorum, the sergeant-atarms is ordered to apprehend absent members and bring them before the bar of the house. The sergeant-at-arms is supposed to know just where these delinquents are to be found, and he and his assistants generally do know. A drinking saloon not far from the Capitol is usually drawn on for a limited thing, and the jailer, happening to know number of statesmen.

A few doors down New Jersey avenue, almost on the site of the first a select poker coterie is occasionally interrupted by the knocking at the door of the sergeant-at-arms. In the immediate neighborhood are two or three other dens in which jack pots are once in a while broken up by the appearance of the officers of the house. There are no public gambling houses in Washington, and the members who often get drunk could be counted on one's fingers. Some strange stories are told by assistant sergeants-at-arms concerning their experiences with junkets and funerals. It is the duty of these officials to act as funeral masters when a member of the house dies, and to make all arrangements for transporting the corpse to the place of interment, accompanied by a committee of congressmen. As a rule, of late years these funeral excursions are managed with dignity and solemnity, though it would be contrary to human nature if a few small jugs and a limited number of bottles of wine and boxes of cigars were not included in the para-

The Garnering Time.

Fair is the world now autumn's wearing, And the singgard sun lies long abed; Sweet are the days now winter's nearing, And all winds feign that the wind is dead.

Dund is the bedge where the crabs bang vellow. Bright as the biomoras of the spring; Durab is the close where the pears grow meliow, And none but the downtless redbressts sing.

Fair was the spring, but amidet his greening Gray were the days of the hidden sun; Fair was the summer, but overweening, So soon his o'ersweet days were done.

Come then, love, for peace is upon us, Far off is failing, and far is fear: Here where the rest is the end bath won us, In the garnering tide of the happy year.

Come from the gray old house by the water, Where far from the lips of the hungry sea Green groweth the grass o'er the field of the slaughter, And all is a tale for thee and me.

Got the Names Mixed.

There must be something in a name, every member of the house is a member, after all. The grand jury reported a number of "true bills" against certain they could not find sufficient evidence on which to hold a number of alleged high priest of the mace lifts the ancient law breakers. Among the former was colored gent named Jackson, against whom an indictment was found for carvmembers. If there is disturbance there ing a colored brother with a razor, and among the latter was a white man of the same name.

When the sheriff was ordered to produce his prisoners in court yesterday he was handed a list of the names of the men wanted. The first batch brought over were those against whom "no bill" was reported. When the names were called at the jail the white Jackson did not answer to his name, but in his place the colored party stepped up. He of the white face thought it policy to "lay

low," so he said nothing. When the names were called in court and the prisoners were ordered to stand up the colored man answered promptly to the white man's name, and he was duly discharged by Judge Seaver. Mr. Jackson returned to the jail for somethat Jackson had been indicted, thought there was some mistake and locked him up. He was rearraigned later and pleaded manor house erected in the Capital City, guilty. The white Jackson was finally released.—Buffalo Commercial.

Another family trait was known of all the friends when the children were small. That was physical courage of the supremest sort. That was an inheritance from the old commodore, who never knew what fear was. Fanny Parnell possessed this quality in the highest degree. She was daring almost to recklessness when she rode to hounds, and as a driver was happiest when she controlled the most spirited, nervous and excitable horses to be found in Ireland. The other girls were brave, physically brave, and often displayed this fearlessness to the admiration of their mates. It is this quality of courage which has stood Charles Stewart Parnell in such good stead.

With his brothers and sisters, however, Charles Stewart Parnell was but little associated after the days of bibs and nurses. He was sent early to school, and afterward entered Oxford. During the long vacations he sometimes came home, but was more likely to remain away, so that it sometimes happened that the family did not see him for months at a time. AMERICAN MEAT IN ENGLAND.

Policy of the British Government in Re-

gard to It. Mr. Chaplin, British minister of agriculture, has always denied that in maintaining the restrictions on the importation of live cattle from the United States he has been actuated by any motives other than a desire to protect British stock from imported disease. But a speech which he made at a meeting of Tory farmers and others at Driffield, in Yorkshire, pretty clearly indicates that he entertains feelings anything but cordial toward the United States government, and that if he dared he would joyfully probibit altogether the importation of American cattle. He professed sorrow at being compelled to restrict importations from friendly countries like Holland and Germany, but in regard to the United States he did not trouble himself even to feign regret. Amid the approving cheers and laughter of his audience he predicted a good time coming when British farmers would cease to receive store stock from America.

American exporters have been repeat edly warned egainst expecting any favor or consideration from Mr. Chaplin, and they may as well undertand now that, so far as America is concerned, the policy of the British board of agriculture will become more of a protectionist nat-The only chance of a change to a more friendly state of things for many years to come is a Liberal victory at the next general election. Should Mr. Gladstone return to power the consumers, who are complaining of high prices, would soon receive consideration, and the fiction that every foreign country was infected with cattle disease would be quickly exposed and denounced. Meanwhile British farmers, who are Torics and supporters of the present government, almost to a man, are filling

In less than a year their cattle have increased by 369,000, their sheep and highest circles and dispensing hospitality lambs by 1,140,000, and their pigs by 262,000. Chaplin promises still greater benefits in the immediate future, and the various agricultural societies, emboldened by their success in the past, will support him heartily in any further steps which he may venture to take against foreign countries in general and America in particular. Here is a verbatim report of that part of his speech:

"You will have seen that power has been given to the president of the United States absolutely to prohibit the importation of goods from any country which, in accordance with his idea, might be acting unfairly to the United States. Well, the Americans considered themselves aggrieved that the English minister of agriculture should continue to insist that cattle from their country should be slaughtered at the port of debarkation, and it was hinted that in resuccess or advisability of the Fenian taliation the president might absolutely prohibit the importation of Manchester, Birmingham and other British goods into America. I do not think I am likely to be less obdurate in the future because of this threat than I have been in the board of agriculture is that, in spite of all the efforts made in America to extirpate pleuro-pueumonia, that disease still exists there. I sat down to write to Mr. Douglas, Clara, but I could not. I would in the first place have to ask him to break his word to his mother and to that other woman, and all for the sake of one who could not fail to be a burden to him. I would have to tell him that every word that Harriet had spoken was true, and I could not do it, Clara. I feel the force of Harriet's words. I should be a drag on him, and a hindrance to himand it is better that I pass out of his laid out for him before the unhappy hour when first we met.

Right up alongside of us sped a catboat, and its occupant, with a dexterous lunge, fastened himself to us with his boat-hook. It was William Sayer. The lumber-

Ever Your Loving NAX. [THE END.]

HIS NOSE ITCHED. But He Did Not Enjey the Way in Which It Was Scratched

"One night," said Ben Holladay to a New York World man, "I was bouncing over the plains in one of my overland coaches.

"Mrs. Holladay and myself were the only passengers. Several stages had been robbed within two months and the driver was ripping along as though a gang of prairie wolves were after him. Suddenly the horses were thrown on their haunches and the stage stopped.

"I was heaved forward, but quickly recovered, and found myself gazing at Louisville Savings, the muzzles of a double-barreled shotgun.

"Throw up your hands and don't stir!' shouted the owner in a gruff voice. "Up went my hands and I began to commune with myself. The fellow then coolly asked for my money. I saw that he did not know who I was, and I was afraid that my sick wife might

"I scarcely breathed through fear that light might strike the stone, and its sparkling brilliancy attract the attention of the robber. I had about \$40,000 in a money-belt and several hundred dollars in my pocket.

"Suddenly my friend shouted: 'Come, shell out-quick, or I'll send the old 'un a free lunch.'

"I passed out the few hundreds loose in my pockets and handed him my gold watch and chain. They were heavy. I think the chain alone would weigh five pounds at least.

" 'There,' said I-there's every cent I've got! Take it and let me go on. My wife is very ill, and I don't know what would happen to her if she knew what was going on.' " 'Keep your hands up!' was the re-

ply, while a second robber received my watch and money. "Then a search was made for the express company's box, but the doublebarrelled shotgun did not move. Its muzzles were within a foot of my nose.

For my life I did not dare to stir. "My nose began to itch. The stiff hairs of my mustache got up, one after another, and tickled it until the sensation was intolerable. I could stand it

" 'Stranger,' I cried, 'I must scratch my nose! It itches so that I am almost crazy!

" 'Move your hands,' he shouted, 'and I'll blow a hole through your head big enough for a jack rabbit to jump

through! "I appealed once more. " 'Well,' he answered, 'keep your

hands still and I'll scratch it for you."

"Did he scratch it?" asked one of Ben's interested listeners. "Sure!" said Mr. Holladay. "How?" asked the breathless listener.

"With the muzzle of the cocked gun!" said the great overlander. "He rubbed the muzzle around my mustache and raked it over the end of my nose until I thanked him and said that it itched no longer."

The robbers soon afterwards took their leave, with many apologies, and Ben continued his journey to the Missouri, with the big emerald and \$40,000.

THE smallest flowering plant in existence is wolffla microscopia, a native of India. It belongs to the duckweed family. It is almost microscopic in size, destitute of proper stem, leaves and roots, but having these organs merged in one, forming a frond. There are two species of the genus found growing wild in the Eastern United States. One of them, wolflia columbiana is about the one-twenty-fifth of an inch in diameter, and the other, wolflis braziliensis, somewhat smaller in size.

Some Suggestions as to County Roads.

(To the Editor Interior Journal.) The enormous expenses of Lincoln county during the year 1890, as shown in the recently published list of the last court of Claims, have occasioned considerable comment among the farmers and property-holders of the county, upon whom rest the principal part of the burden of taxation; and, as I was one of the magistrates composing that court, which allowed these claims, I desire, through your valuable paper, to state just in what these expenses consist, and offer some practical suggestions that will in to need a recapitulation here.
